- Resources: 19 personnel assigned

SITUATION SUMMARY

NORTHERN OPERATIONS FIRES

Washington, Vegetation Fire, Alpine County

Location: Near Silver Peak, south of Markleeville in Alpine County.

Jurisdiction: Federal DPA, FRA (Humboldt Toiyabe NF, NV-HTF-030251)

Per CAL FIRE and Cal OES Fire Duty Officer, and ICS-209 as of 06/23/15 at 2007 hours:

- 13,543 acres, 5% contained
- Active burning with short crown runs
- Meadows above approximately 7,500 feet in elevation are not receptive to fire spread.
- Structure protection plan is in place for Markleeville
- Estimated containment date: 07/05/2015
- Base Camp is located at the Diamond Valley School, Markleeville.
- Two Local Government Strike Teams are on scene as of 06/21/15.
- Fire has potential to approach Markleeville, additional threat to wildlife habitats
- Resources: 681
- On Wednesday, 6/24/15, several elected officials plan to tour the Fire ICP in Gardnerville at 0830 hours. They advised Governor Brown and Nevada's Governor were invited

Structure Threats

- 250 single residences are threatened
- 1 single residence has been destroyed

Activations

- Alpine County has partially activated their EOC in support of the Washington Fire. Cal OES Inland Region is closely monitoring in the event the IREOC needs to be activated.

Deployments

- A Cal OES Fire Assistant Chief is on scene at the Incident.
- A Cal OES Law Deputy Chief will be on site 06/22/15 to meet with Sherriff's personnel and provide support.
- A Cal OES Inland Region ESC is on scene at the incident

Washington, Vegetation Fire, Alpine County**Evacuations/Shelters**

- Per the Cal OES Law Duty Officer, there are no evacuation orders for this fire at this time, with the exception of the campgrounds along the road closures, which have been evacuated. [There are still no mandatory evacuations and priority is still keeping the fire from reaching Markleeville. The fire's progress toward Markleeville has been slowed due in part to good weather. The Alpine County Sheriff's Office has not requested mutual aid but a contingency evacuation plan for the 150 residents has been put in place. In the event Markleeville requires evacuations, the Alpine County Sheriff will direct LEMA resources respond to the Alpine County SO station in Markleeville. El Dorado County SO has already committed to providing mutual aid if needed. The Sacramento County Sheriff's Dept., as the Region IV RMAC, has been advised.](#)
- ACSO has evacuated the following areas: Carson River Resort, Silver Creek Campground and area's below, including Centerville Flat, Wolfcreek Meadows, Hwy 4 along the East Fork of the Carson River and other dispersed campgrounds.
- Alpine SO did a precautionary notification of the Monitor Pass area.
- Per the Cal OES Inland Region Duty Officer, there are no open shelters. A shelter site has been identified if needed.

Road Closures

- Alpine Sherriff's Office advises the Fire has jumped Hwy 4.
- Per the Department of Transportation, State Route (SR) 4 is closed from Ebbetts Pass to the Junction of SR 89.
- SR 89 is closed from the Jct. of US 395 to Laramie St. in Markleeville.

Medical/Health

- There is currently one impacted CDSS community care licensed facility, ROP Qualifying House Freel, 20545 State Route 89, Markleeville. Affected population: 3
- Per National Weather Service Reno: Plume forecasts for the Washington Fire indicate smoke moving east/northeast through this evening before smoke settles into the valleys overnight. Communities near the fire and downstream such as Smith Valley, Yerington, and Fallon are most likely to be impacted with reduced air quality today. Assuming continued fire activity Tuesday, winds will be light becoming northeast by the late afternoon, taking the smoke slowly west into California. Winds are forecast to remain easterly Wednesday and Thursday as well, though there may be brief periods where westerly afternoon winds will kick in and bring some smoke back into western Nevada.

Infrastructure/Utilities

- Per CUEA no threat to the power grid or transmission lines. CUEA will monitor.

Missions

- **2015-Inland-13708:** Request for (1) Air Monitor to Alpine County.
- **2015-SREOC-13728:** Request for (1) Air monitor to northern Mono County

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

Hot weather returns late this week, with above normal temperatures by Tuesday and widespread triple digits in the Sacramento Valley by Thursday. The hottest day of the week is expected to be Friday, gradually cooling over the weekend. A special concern for the heat is the large crowds at the US Senior Open in Sacramento. Moisture spreading northward Friday into the weekend will bring the potential for mountain thunderstorms with limited rainfall initially. A transition to wetter storms is possible as we move through the weekend.

Impacts:

- Heat-related illnesses and impacts possible to likely if action not taken
- Extra heat precautions should be made for outdoor events
- Hot and dry conditions are priming fuels for enhanced fire danger
- Initially dry mountain thunderstorms with lightning could cause fire starts

Active Weather Warnings, Watches and Advisories by County: http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

Prepare for Dangerous Heat!

What **Red** Means . . .

Dangerous heat like this happens only a few times a year. Impacts are likely, even for the general population, if precautions are not taken.

What **Orange** Means . . .

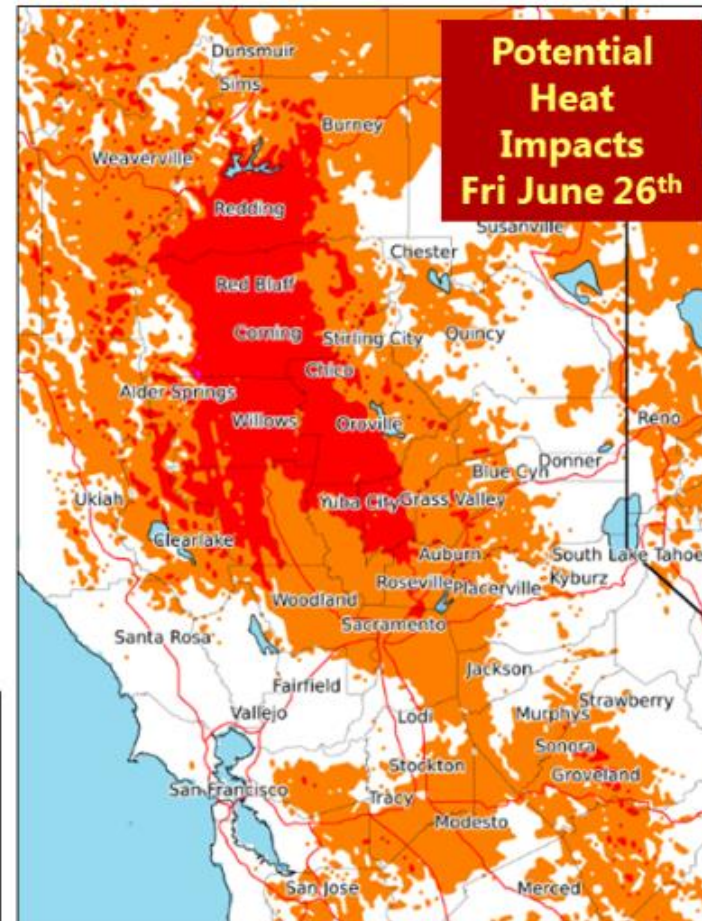

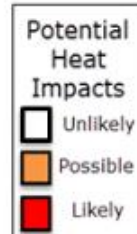

Heat like this happens many times a year. It will be relatively easy to take simple precautions to keep safe.

Advice . . .

- Drink before you're thirsty
- Avoid strenuous activities
- Stay in air-conditioned areas
- Check on the heat-sensitive: (e.g. elderly, infants, pets)

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

A building ridge of high pressure will result in warming temperatures across interior northwest California through the end of the week. Stratus will continue to affect coastal areas each night and morning. An upper level low off the central California coast will bring the potential for thunderstorms Friday into this weekend over the interior.

Medford Weather:

Southern Oregon and northern California will have an unusually long period of hot weather from Thursday into next week with a slight chance to chance of thunderstorms from Friday into next week. The forecast of the region will remain relatively unchanged into the middle of next week.

Reno Weather:

High pressure will create very hot and dry conditions this week with record highs likely by Friday. Thunderstorms are possible along the Sierra crest beginning Friday afternoon and evening with the potential for thunderstorm activity to increase this weekend and early next week

San Francisco Weather:

A warming trend remains on track, peaking on Thursday. Increasing high clouds and slightly cooler temperatures are expected late in the week lasting into the weekend. Warmer temperatures are expected next week.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Warming trend begins today bringing another round of hot weather, peaking Thursday and Friday. Possible shower and thunderstorm activity Friday through the middle of next week, focused over the mountains but with some potentially spreading into the valley.

Hanford Weather:

High pressure will return for the latter part of the week, and temperatures will once again reach at least several degrees above average. Mid-level moisture will move into the region from the southeast and bring a slight chance for showers and thunderstorms over the high country of the Sierra Nevada beginning Friday and continue through the weekend

WEATHER

WEATHER SYNOPSIS BY REGION:

SOUTHERN CALIFORNIA:

Los Angeles Weather:

High temperatures will remain above normal across inland areas with cool and mild conditions along the coastal areas through Friday. A change in the weather pattern will begin this weekend as a surge of monsoonal moisture will move into the region bringing humid and warm conditions with periods of showers and possible thunderstorms for interior locations. A few showers could fall across coast and valleys as well next week.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

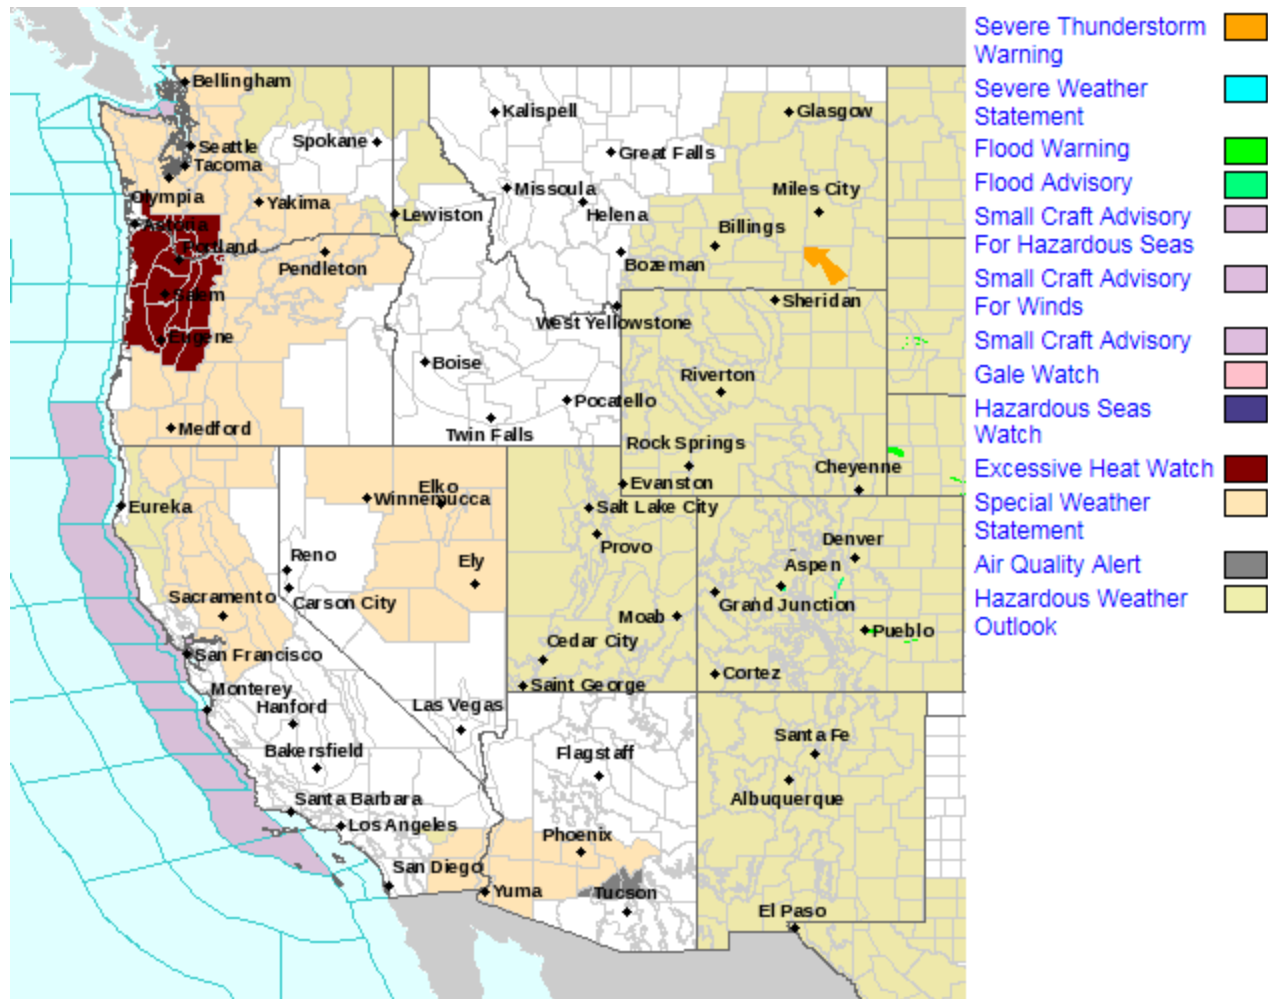

High pressure will keep the weather fair and dry much of this week, with above normal daytime temperatures. Marine clouds will still visit the coastal areas each night, and should increase through the week as the marine layer deepens slightly. Starting this weekend through at mid-next week, monsoonal moisture will overspread the region from the southeast, increasing clouds and humidity, and bringing a chance for mainly afternoon and evening showers and thunderstorms, mainly over the mountains and deserts.

Southeast California Weather:

Above normal temperatures will persist across the region through much of the upcoming week, but will retreat from the record-tying values seen last week. Moisture will begin to move into the area from Mexico, increasing chances of mountain showers and thunderstorms beginning today and heading into the weekend. Thunderstorms will bring the threat of strong gusty winds and potential for blowing dust to the Arizona deserts for the rest of the work week. An uptick in storm activity area wide is possible by the late weekend into early next week.
